MISSION

The AOK Network is a community-based collaboration that is committed to developing a high-quality, well-coordinated, easily accessible system of care that will promote positive growth and development for pregnant women, children birth to five, and their families. The overall goal of the AOK Network is to ensure that all pregnant women, children birth to five, and their families have the opportunity to receive the services they need.

NETWORK PARTNERS' ROLE

Network partners will provide ongoing assessment of needs and services, along with public education and will promote the AOK network. Network partners will support each other by sharing information, facilitating access to services and seeking opportunities for collaboration.

NETWORK FUNCTION

Bimonthly network meetings are held to discuss how to better serve families in Adams County. By attending network meetings and taking an active role in work groups, partners help build a well-coordinated and easily accessible system that promotes positive outcomes for pregnant women, young children, and their families.

*When **Communities** build what they dream
Then **Families** get what they need
And **Children** thrive*
